

SportsAgenda 1.00.03 - February 2nd 2009

SportsAgenda 1.00.02 - December 19th 2008

1.00.03

SportsAgenda

1. Corrected export of GPX file for a test
2. Corrected download from AIM website of manual
3. In Sport "Running" better calculation of speed
4. Better algorithm for calculation of distance of laps in a test
5. Corrected visualization of report page for athlete and sport of the last downloaded test

Download

1. Speed in Sport "running", visualized in "min/km" for graphs of the single test

1.00.02

SportsAgenda

1. Export of GPX file for a test (for SportTracks and other software)
2. SubVersion description for firmware version in additional info
3. Export of CSV file for a test (for Training Peaks)

Download

1. Fixed bugs: the fields athlete, test comments and firmware subversion were missing in .drk file
2. Fixed bug about measures with sampling rate over then 2Hz and not coming from GPS (like Acc_x, Acc_y, Acc_z).
